

AI BASED DISCOURSE FOR BANKING INDUSTRY

PROJECT OBJECTIVES

Artificial intelligence (AI) has been a subject of interest in the research field for the past few years. It has now been brought closer to commercial use due to recent technological advances and speedier data accessibility. Its relevance to global business models is underlined by the significant investments in it made by Internet powerhouses including Google, YouTube, Amazon and Facebook. In the banking sector where data is of substantial value, AI has been incorporated in pilot projects but its true applications have yet to see the light of day. In this study, the drivers and barriers to successful AI implementation in the banking sector is analyzed using a panel data of 28 semi-structured interviews with AI experts in the field of banking and finance. It's include following with,

- Create IBM Watson assistant service
- Creating skills creation
- Creating saving account action
- Creating current & loan account action
- Creating general query action
- Creating Net banking action
- Creating Assistant & Integrate with flask web page
- Creating Phases.
